

The Governing Conspiracy: Project Outline

Thematic Overview

The Governing Conspiracy explores the overarching systems of corruption and control that govern societies globally. With an investigative tone, the project aims to uncover hidden truths, spark public discourse, and empower audiences to question and challenge these systems. The website blends investigative journalism with multimedia storytelling to provide an engaging and educational user experience.

Features

- A visually striking homepage introducing the project's mission, latest articles, and featured vodcasts.
- An archive of investigative articles categorized by theme (e.g., corruption, secret programs, solutions).
- A multimedia section hosting vodcasts, video interviews, and downloadable PDFs.
- Profiles on individuals impacted by government corruption, emphasizing personal stories.
- Interactive comment sections to foster community discussions and engagement.
- Secure sections for subscribing to newsletters or donating to the project.
- Integration with social media platforms for sharing content and expanding reach.

Content

The Governing Conspiracy will feature diverse types of content:

- 1. **Articles**:** In-depth investigations into systemic corruption, secret programs, and solutions.
- 2. **Vodcasts**:** Recorded episodes discussing conspiracy theories, real-life events, and historical contexts.

3. ****PDF Archives****: Downloadable documents offering additional context and evidence.
4. ****Profiles****: Detailed accounts of individuals targeted by corrupt systems, with insights into their stories.
5. ****Solutions****: Proposals for systemic change, community action, and public empowerment.

Technical Requirements

- WordPress with a customizable theme to reflect the investigative tone and dark aesthetic.
- Key plugins: Advanced Custom Fields (ACF) for structured content, WPForms for interactive sections.
- Integration with Nextcloud for backend content management and secure file sharing.
- A robust commenting system for community engagement, such as Disqus or built-in WordPress comments.
- Responsive design to ensure optimal performance across devices.

Collaboration Goals

This project requires close collaboration between you and Jono to:

1. Design and implement the website layout, ensuring usability and visual appeal.
2. Integrate multimedia content effectively, optimizing for performance.
3. Build and test features like user profiles, comment sections, and social sharing tools.
4. Coordinate on content updates, ensuring timely publication of articles and vodcasts.
5. Maintain a secure and scalable backend for data storage and user engagement.
