▼ Omniversal.Cloud - Drupal

Got it! Let's start designing **Omniversal.Cloud** as your central hub with a dark, cosmic theme inspired by the Andromedan Galaxy. Here's an outline of the organizational structure and what we'll build:

Drupal Site Structure for Omniversal.Cloud

1. Home Page: Omniversal.Cloud

- **Purpose:** Serve as the main hub linking all domains.
- **Content:**
 - Introduction to the Omniversal Cloud.
 - A grid or list of hyperlinks to each domain with short descriptions.
 - A footer linking to subpages like "About," "Contact," and "Admin."

2. Domains Directory (Subpage)

- **Purpose:** Detailed list of all domains hosted under Omniversal.Cloud.
- **Content:**
 - Each domain as a hyperlink with:
 - A short description.
 - Purpose or vision for the domain.
 - Status (e.g., "Under Development," "Live").
 - Search and filter functionality for quick navigation.

3. Individual Domain Pages

- **Purpose:** Highlight each domain's purpose, content, and progress.
- **Structure:**
 - **Header:** Domain name and tagline.
 - **Sections:**
 - Description.
 - Planned features or content ideas.

- Hyperlink to the live site (if applicable).
- Notes on ongoing development.

4. Admin-Only Page

- **Purpose:** Secure area for managing domain logins and other sensitive information.
- **Content:**
 - Login credentials for each site.
 - Notes on hosting details and migration plans.
 - Access restricted to specific roles.

Theme and Design

Dark Aesthetic Theme

- **Colors:**
 - Background: Deep space black with subtle gradients of indigo and dark purple.
 - Text: Light gray and white for readability.
 - Accents: Galaxy-inspired hues like blue, violet, and cyan.
- **Imagery:**
 - High-resolution Andromedan Galaxy photos as section headers or backgrounds.
 - Cosmic-inspired icons and visuals for navigation elements.
- **Typography:**
 - Sleek, sans-serif fonts for modern readability.

Content Drafting

I'll start drafting the **Home Page** and **Domains Directory** content for Omniversal.Cloud, including placeholder links to your domains. Then, I'll create a template for individual domain pages with sample content.

Would you like me to focus on any particular domain or feature first? Or should I draft these in sequence starting with Omniversal.Cloud's main page? Let me know, and I'll dive in!
